## WORK EXPERIENCE:

### **Tech Lead and Full-stack web-mobile developer (Jun 2015 – present )**

#### **Alyomhost Co.**

- I was the person who suggested and took the first move to add mobile applications development to the company services and that helped the company to Increase its sales to approximately 50%.
- I developed several applications and their backend in the last 5 years using Node JS and PHP for Backend, React JS, Redux, React-native, Titanium Appcelerator the mobile and web applications.

### **Senior Web-developer (Sep 2012 – Jun 2015 )**

#### **Alyomhost Co.**

- Enhance the quality of the company products to 50% with minimum time cost by developed CMSs for native projects, and modules and plugins used with most popular CMSs like WordPress and OpenCart.

### **Outsource team leader (April 2012 – Aug 2012 )**

#### **Sunsoft Co.**

- Mentoring the tech team to build an order online website from restaurants
- Helping them to learn and use OOP, and several technologies to improve their skills

### **Technical Manager (December 2010 – March 2012 )**

#### **Ibntaymyah Co.**

- Creating the project plan.
- Manage the meetings with the Marketing and the Sales department.
- Manage projects day by day.

**Web Developer (Jul 2010 –November 2010)**

**Ibntaymyah Co.**

- Create the company CMS .
- Improve sites' performance
- Manage the company's " hosting space".

**Web Developer (October 2009 –June 2010)**

**EgyTronic Co. For Technology**

- Analyze, develop and implement web projects using PHP,MYSQL and AJAX technologies.
- Develop the modules of the company CMS using Codeigniter framework.

**Web Developer (December 2008 – September 2009)**

**Tay4tech Co. For Technology**

- Creating the company CMS
- Analyze, develop and implement web projects using PHP,MYSQL technologies.

**Freelance Web Developer (September 2007 – January 2008)**

- Analyze, develop and implement web projects using PHP/MYSQL.

**Key Projects:**

- **Booking trucks App**
  - The project consists of three applications, I developed one of them, and the whole backend and API.
  - The application has real-time service to monitor the location of the truck, I used Socket-IO With Node JS in the backend and Socket-client with React-Native
  - I developed server applications with the same concept.
- **POS:**
  - Point Of Sale application to manage stores products, orders and customers and also to stores' salesman
  - I was the Mobile application developer for this application and the mentor of how the API should be developed and the full process.
- **Trip Tech:**
  - Booking boats and buying equipment fishing Mobile Application.
  - I was the lead developer of the team who was responsible for this project, I Designed the DB and Implement the REST API, Control panel Dashboard, and the mobile application.
- **Maintenance Home:**
  - Booking Services Mobile Application, to fix issues in a house.
  - I was the full-stack developer for this application, I designed, and implemented API, Control panel, and the mobile application to handle 2 types of customers and orders between them.
  - There is a chat between the users, so to guarantee real-time I used Firebase real-time DB.
- **Taq:**
  - Employees Tasks management Mobile application
  - I was the team leader of this app. I mentored the backend developers in their work on the Dashboard control Panel and develop the API and the mobile application.
- **E-commerce** like book store, or third party providers websites, helping users selling their products
- **E-learning** websites like schools websites to help teachers, parents an student to communicate

**EDUCATION:**

- **Bachelor degree** in Engineering (2006) Computer science Department , Mansoura University , Egypt.
- **Premaster, in information technology**, June 2011.

- **Web Development Track** • MCIT – Ministry of Communications and Information Technology  
– Scholarship.

**IT certifications:**

- **Nano-degree in cloud AWS**
- **CIW Web Developer Certificate.**
- **CIW Professional**
  
- **Berlitz English Language 4 Levels.**

**Languages:**
